

Recording and Editing Audio Podcasts with Your Windows-Powered Pocket PC or Smartphone

by TariAkpodiete@gmail.com

Most mobile devices have software built-in which will record a conversation. However, it is often rudimentary and rarely has the options required to record, let alone edit a podcast. I use the following programs, and I will also be giving away one of each at the end of this session.

VITO AudioNotes

Cost: U\$19.95 / 14-day trial

URL: <http://www.vitotechnology.com/en/products/audionotes.html>

Main Features:

- record notes in MP3 and WAV formats
- append recording to the same file after stop
- choose from optimal recording presets: low, medium, high quality
- store recordings to storage card or main memory
- increase microphone sensitivity with automatic gain control
- avoid silence gaps with VAS (Voice Activation System)
- control the file size growing while recording
- move them between main memory and storage card
- send via email or MMS (Windows Mobile 5.0)
- perform basic operations like play, rename, delete
- view properties
- sort by name or date
- Press the assigned button to start recording anytime
- Press it while recording to pause and resume

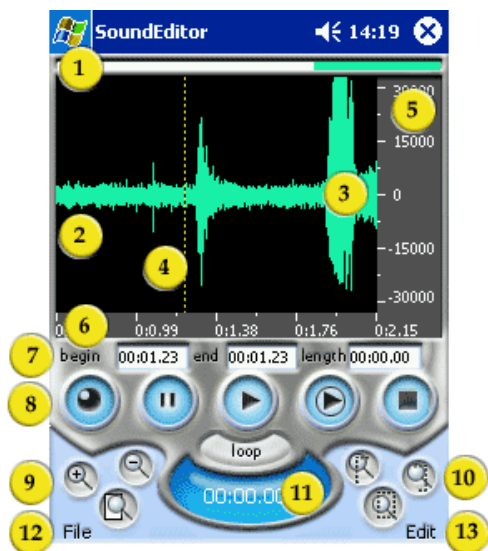

VITO SoundEditor

Cost: U\$15.95 / 14-day trial

URL: <http://www.vitotechnology.com/en/products/soundeditor.html>

Main Features:

- supports native non compressed WAVE format
- basic set of tools (copy, cut, paste)
- works with external storage cards
- stylish and intuitive user interface
- proprietary visualisation algorithm provides quick access to large files and fast editing
- one step Undo/Redo
- recording new sound file
- file copying for editing

VITO SoundExplorer

Cost: U\$24.95 / 14-day trial

URL: <http://www.vitotechnology.com/en/products/soundexplorer.html>

Main Features:

- Supports Windows Mobile 5.0
- Supports high-resolution displays
- Supports landscape mode
- Converts WAV to MP3
- Records CD-quality MP3: 44 100 Hz
- Supports two skins in portrait and landscape modes
- Features Today plugin
- Supports 240x240 screens
- Features multilanguage interface
- Is all you need for music playing and sound recording
